Professional Summary

Back-End and Full Stack Python Developer with solid expertise in relational databases, RESTful architecture, and software engineering. Graduated in Systems Analysis and Development and postgraduate student in Full Stack Software Engineering. Creator of *Krosmox SGR*, passionate about solving business and technical challenges through clean, maintainable, and high-performance software solutions.

Education

POSTGRADUATE DEGREE | FULL STACK SOFTWARE ENGINEERING | 10/2027 | ANHANGUERA

ASSOCIATE DEGREE | SYSTEMS ANALYSIS AND DEVELOPMENT | 2023-2026 | ESTÁCIO

BACHELOR'S DEGREE | INFORMATION SYSTEMS | 2020-2022 | UNINASSAU

- Attended up to the 5th semester

TECHNICAL HIGH SCHOOL | INFORMATION TECHNOLOGY | 2016-2019 | CETEP-SISAL SERRINHA-BA

Certifications & Continuing Education

- Certification: Scalable Algorithm Programming — Estácio
- Certification: Internet Programming and Web Systems — Estácio
- Certification: Rapid Python Application Development for Cloud, IoT, and Big Data — Estácio
- Certification: Information Systems Programming — Estácio
- Professional Course: Database Administrator (DBA) — SENAI Taguatinga (200h)

Skills & Technical Knowledge

SOFTWARE ENGINEERING & REQUIREMENTS

- Elicitation, analysis, and specification of functional and non-functional requirements.
- System and workflow modeling (UML, use case diagrams, and data flow diagrams).
- Software architecture, clean code principles, and design patterns.
- Agile methodologies (Scrum, Kanban) and collaborative version control with Git.

REST APIS

- RESTful API development with Django REST Framework and FastAPI.
- Security standards with JWT authentication, session handling, and Webhooks.
- Versioning best practices and comprehensive documentation (OpenAPI / Swagger).
- Automated and manual endpoint testing with Postman.

DATABASES

- In-depth knowledge of relational database engines: MySQL, PostgreSQL, SQL Server.
- Conceptual, logical, and physical modeling; Functions, Queries, Views, Triggers, and Stored Procedures.

DEVOPS & INFRASTRUCTURE

- Docker, Git, GitHub Actions, VMware, Linux.

ARTIFICIAL INTELLIGENCE & AUTOMATIONS

- Integration with online payment gateways and financial transaction split.
- Bots and automated backend workflows.

LANGUAGES

- Portuguese: Native.
- English: Intermediate.
- Spanish: Intermediate.

Professional Experience

FULL STACK DEVELOPER | FREELANCE / INDEPENDENT | 2025 - PRESENT

- End-to-end development of cross-platform applications based on Django REST Framework and React / React Native.
- Full lifecycle management: database modeling, API architecture, responsive frontend, and production deployment.

IT & MOBILE DEVICE TECHNICIAN | FREELANCE / CONSULTANT | 2015 – PRESENT

- Specialized maintenance, diagnostics, and repairs on laptops, desktop workstations, and mobile devices.
- Electronic circuit board diagnostics and component-level repairs.

COMPUTER SCIENCE INSTRUCTOR | 16TH MILITARY POLICE BATTALION | 2019 - 2019

- Instructor in the "Saber Digital" community initiative, teaching computing fundamentals and hardware maintenance.
- Classroom organization, lesson planning, and technical content development.
- Technical support, maintenance, and network troubleshooting in the computer laboratory.

SYSTEMS ANALYSIS INTERN | 7VIRTUAL SISTEMAS | 2018

- Diagnosis and error reporting for queries and routines in relational database systems.
- Direct tier-2 technical support for end-users and commercial software clients.
